**Lot Name:** Abandoned Amusement Park, Farm & Lake Hike

**Description:** On this hike you'll see remnants of the 1940's Argonne Forest Amusement park at Possum Creek Metropark. After a walk through the Argonne Forest, we'll take a hike up to the barn area and see if any animals are lurking about. Then we'll come back via Argonne Lake. Total hike will be around 2.5-3 miles. This will be a leisurely hike so we can stop and look when we get to something interesting. In between we'll keep it moving, but I'll go the speed of the group. Children who can keep up with the adults are welcome (10 and up recommended). The hike will last 90 minutes to 2 hours (depending on how long we stop at the barn). There are some very small hills and we'll be out in the sun for some of the hike, so bring sunscreen, bug spray, water and a sun hat. Also, be prepared for squishy trails if it's been rainy. Shoes/pants you don't mind getting muddy are recommended. We will kick off the hike at 2pm from the Argonne Forest Parking lot at 4790 Frytown Rd., Dayton, OH 45417. A map of the park and more information can be found at <http://www.metroparks.org/places-to-go/possum-creek/>. If you want to carpool, we'll leave from the MVUUF parking lot at 1:30pm. **Lot Name:** Kombucha Starter (SCOBY)

**Description:** Known as the "Immortal Health Elixir" by the Chinese and originating in the Far East around 2,000 years ago, kombucha is a beverage with tremendous health benefits. Kombucha is a fermented beverage of black tea and sugar (from various sources including cane sugar, fruit or honey) that's used as a functional food. It contains a colony of bacteria and yeast that are responsible for initiating the fermentation process once combined with sugar. After being fermented, kombucha becomes carbonated and contains vinegar, b-vitamins, enzymes, probiotics and a high concentration of acid (acetic, gluconic and lactic), which are tied with the following effects: Improved Digestion Weight Loss Increased Energy Cleansing and Detoxification Immune Support Reduced Joint Pain Cancer Prevention The sugar-tea solution is fermented by bacteria and yeast commonly known as a "SCOBY" (symbiotic colony of bacteria and yeast). Although it's usually made with black tea, kombucha can also be made with green tea too. You can make kombucha yourself at home or buy it for \$3-\$5 a bottle at most health food stores and some coffee shops. I will provide you with a SCOBY, instructions, and tea bags to get started. You will need a gallon glass jar and a cup of sugar. Estimated Value: \$5-15 Each winning bid receives: One SCOBY, instructions, and tea bags
